| Introduction | 1 |
| Section I: Arranging the Landscape to Help Cool a House in Summer | 5 |
| CHAPTER 1: THE SUN AND THE WIND | 7 |
| CHAPTER 2: SHADING THE HOUSE | 21 |
| ACTION: Provide Shade During Early Morning and Late Afternoon | 23 |
| ACTION: Shade the House During Mid-afternoon and Mid-morning | 26 |
| ACTION: Shade South-facing Windows and Walls | 30 |
| CHAPTER 3: COOLING THE AIR AROUND THE HOUSE | 35 |
| ACTION: Add Trees and Many Other Plants to Your Landscape | 37 |
| ACTION: Capture Breezes | 38 |
| CHAPTER 4: COOLING THE GROUND NEAR THE HOUSE | 43 |
| ACTION: Shade the Ground with Living Plants | 44 |
| ACTION: Cover Bare Ground with Mulch | 46 |
| ACTION: Minimize the Extent of Mown Lawn | 46 |
| ACTION: Minimize Hard Surfaces, Especially Near the House | 48 |
| ACTION: Use “Cool Pavement” On Driveways | 49 |

| | |
|---|------------|
| Section II: Arranging the Landscape to Help Warm a House in Winter | 53 |
| CHAPTER 5: TAKING ADVANTAGE OF THE SUN’S HEAT | 55 |
| ACTION: Allow Maximum Sunlight to Reach the House at Midday..... | 57 |
| ACTION: Make the Most of Morning and Afternoon Sunlight..... | 60 |
| CHAPTER 6: REDUCING THE CHILLING EFFECT OF WINTER WIND..... | 63 |
| ACTION: Plant a Windbreak..... | 64 |
| ACTION: Plant a Buffer near the House..... | 68 |
| ACTION: Position Structures to Deflect Wind | 70 |
| Section III: Designing the Realm of Plants..... | 73 |
| CHAPTER 7: CREATING HEALTHY WORKING ECOSYSTEMS | 75 |
| ACTION: Use Regionally Native Plants | 77 |
| ACTION: Select Plants That Contribute to the Work of Nature | 82 |
| ACTION: Match Plants to Soil Conditions | 83 |
| ACTION: Add Nothing; Just Remove Unwanted Plants | 87 |
| CHAPTER 8: REDUCING (OR ELIMINATING) LAWN..... | 89 |
| ACTION: Stop Mowing Some of the Lawn..... | 91 |
| ACTION: Replace Some Amount of Existing Lawn with Other Elements..... | 93 |
| ACTION: Design a Lawn-free Landscape | 96 |
| CHAPTER 9: USING WATER EFFICIENTLY | 99 |
| ACTION: Design Gardens for Least Water Demand..... | 100 |
| ACTION: Manage Runoff with Topography | 103 |
| ACTION: Collect Rainwater..... | 106 |
| Section IV: Designing the Whole Property | 111 |
| CHAPTER 10: FITTING THE LANDSCAPE TO THE LAND..... | 113 |
| ACTION: Revise Your Ideas to Fit the Terrain..... | 115 |
| ACTION: Use the Gentlest Terrain for Things That Need It..... | 116 |
| ACTION: Use Steeper Slopes for Things That Don’t Need Level Land..... | 117 |
| CHAPTER 11: DESIGNING THE CAR ZONE | 119 |
| ACTION: Put the Driveway in the Right Place..... | 120 |
| ACTION: Design the Car Zone Big Enough, but Not Too Big..... | 124 |
| ACTION: Choose Suitable Paving Material..... | 127 |

CHAPTER 12: MAKING THE MOST OF EVERY ELEMENT131

 ACTION: Design for Function As Well As Appearance.....131

 ACTION: Design for Multipurpose134

 ACTION: Use Materials Efficiently.....136

CHAPTER 13: SITUATING NEW HOMES WITH ENERGY IN MIND139

 ACTION: Position the House for Maximum Solar Gain140

 ACTION: Situate Buildings in Accord with the Wind.....142

 ACTION: Plan First, Cut Later143

 ACTION: Buy the Right Land for Your Needs.....144

Section V: Construction and Care147

CHAPTER 14: INSTALLING AND MAINTAINING PLANTED AREAS149

 ACTION: Limit Importing Topsoil from Off-site.....149

 ACTION: Amend Soil Only When Necessary, and with a Light Touch.....152

 ACTION: Plant Trees and Shrubs Properly158

 ACTION: Mulch Bare Garden Soil163

 ACTION: Plant Wildflower Meadows So They Thrive.....165

 ACTION: Create Healthy Low-maintenance Lawns.....170

 ACTION: Water Wisely173

 ACTION: Acquire Plants Appropriately.....176

CHAPTER 15: BUILDING STRUCTURES IN THE LANDSCAPE179

 ACTION: Lay Patios and Paths to Be Durable.....179

 ACTION: Build Stone Walls so They Hold Up Well.....184

 ACTION: Build Wood Structures for Long Life.....186

 ACTION: Use Alternative, Renewable Materials192

CHAPTER 16: CONSTRUCTING NEW HOMESITES197

 ACTION: Protect the Site Before and During Construction197

 ACTION: Use Energy-efficient Construction Techniques202

 ACTION: Consider Building an Earth-sheltered Home.....205

 ACTION: Heal the Site after Construction209

Section VI: Generating Energy in Your Landscape.....211

| | |
|--|-----|
| CHAPTER 17: MAKING ELECTRICITY FROM SUNLIGHT | 217 |
| What's Involved? | 218 |
| What's Required? | 219 |
| CHAPTER 18: GENERATING ELECTRICITY FROM THE WIND | 223 |
| What's Involved..... | 224 |
| What's Required | 225 |
| CHAPTER 19: HARNESSING THE ENERGY OF FLOWING WATER | 229 |
| What's Involved? | 230 |
| What's Required? | 230 |
| CHAPTER 20: CAPTURING THE WARMTH OF THE GROUND | 235 |
| What's Involved? | 235 |
| What's Required? | 236 |
| Section VII: Lights in the Landscape..... | 239 |
| CHAPTER 21: LIGHTING WITH ENERGY IN MIND | 241 |
| ACTION: Use the Right Energy Source for the Job | 241 |
| ACTION: Arrange Electrical Circuits to Allow Maximum Control | 243 |
| ACTION: Install Various Kinds of Controls..... | 244 |
| ACTION: Use the Most Appropriate Light Bulb | 246 |
| ACTION: Point Light Downward, Not at the Sky | 250 |
| ACTION: Clean and Maintain Light Fixtures | 252 |
| Conclusion | 253 |
| Appendix A: Details and Calculations | 257 |
| Appendix B: Plant Lists | 265 |
| Appendix C: Resources | 273 |
| Endnotes..... | 277 |
| Bibliography..... | 281 |
| Index..... | 285 |
| About the Author | 293 |
