	Acknowledgments	XV
	Foreword, by Paul Ehrlich and Anne Ehrlich	xvii
	Introduction	xxiii
	PART I: TECHNOLOGY AND ITS LIMITATIONS	
1	The Inherent Unavoidability and Unpredictability of	
	Unintended Consequences	3
	Interconnectedness	3
	Human Improvement upon Nature	5
	Unavoidable Negative Effects of Technology	7
	Irreversible Consequences	8
	The Limitations of Reductionism	11
2.	When Things Bite Back: Some Unintended	
	Consequences of Modern Technology	17
	Unintended Environmental Consequences	17
	Unintended Consequences of Industrialized Agriculture	23
	Unintended Side Effects of Genetic Engineering	25
	Unintended Consequences of the Automobile	28
	Intended and Unintended Consequences of	
	High-Technology Warfare	31
	Unintended Consequences of High-Tech Medicine	33
	$Unintended\ Consequences\ of\ Technological\ Revolutions. \ .$	43
	The Decline in Fitness of Future Generations	46
3.	Technology, Exploitation and Fairness	49
	Technology and Exploitation	50
	Technological Exploitation of Nature	53
	Human Domination of Nature	56
	Machines and the Control and Exploitation of Workers	60
	Television: A Powerful Tool for Social Control	
	and Manipulation	64
	Military Technologies	68

4.	In Search of Solutions I: Counter-Technologies
	and Social Fixes
	Counter-Technologies
	Social Fixes
	Environmental Counter-Technologies
	Military Counter-Technologies
	Medical Counter-Technologies 80
	Unintended Consequences of Counter-Technologies
	and Social Fixes
5.	In Search of Solutions II: Efficiency Improvements 91
	Technological Progress and Rising Material Affluence 94
	Efficiency Improvements and Limited Resources 98
	Inherent Limits to Efficiency Improvements 109
	Unintended Consequences of Efficiency Solutions
6.	Sustainability or Collapse?
	Sustainable Development and Eco-Efficiency
	Three Conditions for Long-term Sustainability
	Challenge #1: Serious Environmental Impacts of
	Large-Scale Renewable Energy Generation
	Challenge #2: Replacement of Non-Renewable Materials
	with Renewable Substitutes
	Challenge #3: Complete Recycling of
	Non-Renewable Materials and Wastes
	Sustainability or Collapse?
	PART II: THE UNCRITICAL ACCEPTANCE OF TECHNOLOGY
7.	Technological Optimism and Belief in Progress 145
	Belief in Progress: A Brief History
	Comparison of Belief in Progress to Religious Faith 152
	Ignorance: The Basis of Most Techno-Optimism 154
	Medical Techno-Optimism
	Techno-Optimism and the Mass Media
	The Decline of Techno-Ontimism

Contents xiii

8.	The Positive Biases of Technology Assessments	
	and Cost-Benefit Analyses	173
	An Overview of Cost-Benefit Analysis	174
	Problem #1: Boundary Selection and Externalization of Costs	176
	Problem #2: Prediction of Potential Impacts and Selection	
	of Appropriate Indicators	180
	Problem #3: Institutional Biases and the Perception of	
	Costs and Benefits	183
	Problem #4: Monetization of Non-Market Values	185
	Problem #5: The Ethics of Cost-Benefit Analyses	187
	The Uncritical Adoption of the Automobile	189
	The Hidden Costs of Biofuels	192
	Limited Testing of the Effectiveness of Medical Therapies	194
	Gross Domestic Product (GDP): A Biased Indicator	
	of Economic Progress	200
9.	Happiness	207
	$\label{thm:consumerism} \mbox{Technological Innovation, Consumerism and Materialism} \ . \ .$	208
	Material Affluence and Happiness	214
	Explaining the Paradox	216
	Sources of Happiness	224
	The Destruction of Traditional Sources of Happiness	226
10.	The Uncritical Acceptance of New Technologies	235
	The Myth of Value-Neutrality	235
	The Myth of Autonomous Technology	241
	The Technological Imperative	243
	Technological Dependency and Loss of Freedom	245
	The Undemocratic Control of Technology	248
11.	Profit Motive: The Main Driver of	
	Technological Development	253
	Technological Development as a Social Process	253
	Understanding the Meaning of Profit	255
	Profit Maximization and the Development	
	of New Technologies	258
	Profit Maximization: Agriculture and Food	261

	Profit Maximization: Medical Care	. 263
	Profit Maximization: Military Technologies	
	and Foreign Policy	. 266
	PART III: THE NEXT SCIENTIFIC AND	
	TECHNOLOGICAL REVOLUTION	
12.	The Need for a Different Worldview	271
	The Power of Worldviews and Paradigms	. 271
	Conflicting Worldviews and Paradigm Shifts	. 273
	A Different View of Reality.	. 277
	A Different View of the Economy	. 279
	A Different View of Science and Technology	. 285
	A Different View of Medicine	. 286
	The Need for Increased Awareness	. 289
13.	The Design of Environmentally Sustainable and Socially	
	Appropriate Technologies	295
	Design Criteria for Environmental Sustainability	
	Design Criteria for Social Appropriateness	
	The Prevention of Unintended Consequences	
	The Democratic Control of Technology	
	Local Organic Agriculture: A Model of Environmentally	
	Sustainable and Socially Appropriate Technology	. 309
14.	Critical Science and Social Responsibility	313
	The Myth of Value-Neutrality	
	A New, Critical Science	
	The Question of Responsibility	
	The Problem of Professionalism	
	The Need for Comprehensive Professional Ethics	. 330
	Toward a Critical Science and Engineering	. 334
	For Further Thought	339
	Bibliography	
	End Notes
